#### **NOTES TO THE FINANCIAL STATEMENTS**

- 1) Balance Sheet Cash position is holding at \$3 million over last year.
- 2) Three (3) Wells Fargo CD's matured in June totaling \$735,000 which was deposited into the WF Advisors Cash Sweep account. On June 13<sup>th</sup> \$1,500,00 was transferred out of the Sweep account to Charles Swab to be invested in the laddered Treasury Bills. In November of this year \$1,195,000 of maturing CD's will be transferred to TexPool. At that point in time there will approximately \$8.8 million at TexPool and \$8 million in US Treasuries.
- 3) Revenue & Expense May 2025 only. Interest income was \$61 thousand lower than last year due to timing of CD's maturing. Sales Tax collections were \$94 thousand less than last year. There was a TIFMAS reimbursement of \$118 thousand in May. There was a \$30,000 Facility Rental paid by Lake Travis Fire (ESD#6) for a one year rental of Mackey Field. Comparative Expense for last May was \$170 thousand higher. Thus, May of this year was a positive cash flow compared to negative cash flows of prior May's. In June of this year we collected \$633,000 in Net Sales Tax, which will help offset the predicted negative cash flow in June.
- 4) Revenue & Expense Year to Date has a \$1,552,365 Total Revenue higher than last year. Half of that increase is due to \$905,907 in TFMAS collections. There is \$250,000 outstanding in TIFMAS billings that will probably be collected prior to 9-30-2025.
- 5) Budget vs. Actual for the eight months is tracking positive on nearly all accounts.
- 6) Checks over \$2,000. August Industries \$30,844 was for a new SCBA Air Compressor to refill the breathing air storage tanks which in the past had to be transferred from Sation 301. Coldwater Construction \$17,371 was for the 50% balance on constructing drainage improvements for Station 301.

#### **June 2025 Sales Tax Summary**

The June allocation reflects sales made during the month of April.

Our June 2025 sales tax allocation was \$633,163 which was up 17.5% (\$94,295) compared to June 2024 and down 0.4% (\$18,506) year to date compared to last fiscal year.

Our top 10 large companies accounted for 55.1%, our top 30 large companies accounted for 70.5%, and our top 100 large companies accounted for 84.1% of our total fiscal year to date collections.

Compared to June 2024, we saw increases from The Omni Barton Creek (60%), several concrete and landscaping companies, and the gas pipeline. We continued to see decreases from McCoy's (20%). Last month, we noted that a large pest control company in the District had not reported. The business has moved out of our District, so that revenue is not anticipated to return. We did see an allocation from Vaughan & Sons this month, but not an amount that appeared to "catch up" the zero allocation from last month. We will continue to monitor but this may have been a case of no activity for the month of March for them.

June - Sales Tax Allocations by Year

June 2025 Operations Report

#### **Significant Events**

May 4 (A) - Structure Fire - AutoAid Given (Austin) - 6401 Rialto Blvd #217

[Truck 302] TK302 arrived and assumed Outside Truck as the second truck on scene. Upon TK302's arrival, the fire had been knocked down. Command requested that TK302 coordinate with Inside Division on shutting down and draining the sprinkler system to prevent any further water damage. TK302 located the riser room and E37 was already draining the system. TK302 did a face to face with Inside Division and they did not have any further needs. TK302 reported this to Command and stood by for further orders. Shortly afterward, Command downgraded the alarm to a few units and cleared TK302. TK302 gathered equipment, cleared the call, and returned into service.

May 13 (B) – Structure Fire – AutoAid Given (Lake Travis) – 7817 Lynchburg Drive [Truck 302] TK302 responded code 3 to a structure fire in ESD 6. While responding, crews on scene reported heavy black smoke and operating in an offensive mode. TK302 arrived on scene as second truck and assumed Outside Truck. Command made TK302 Outside Division. TK302 crew had to walk to the scene due to limited access and crew did a 360 of the structure and verified the power was shut off. The residence had solar power also and power had been turned off and main breaker had 4 tripped breakers with all other breakers manually turned off. The structure had a moderate amount of black smoke coming from one of the three garage doors and crews working to cut another garage door open. TK302 checked all the exterior and eaves with no heat above 105 degrees. TK302 relayed the information to Command and TK302 assisted crews on the exterior with cutting the second garage door open. Inside Division called the fire knocked down and was checking for extension. After Inside Division came out of the structure for rehab, Command had TK302 take Inside Division and assist with smoke removal. Crews already had 1 fan at the door and TK302 had 3 additional fans brought to the structure. TK302 moved a fan to the second story and used it to assist with moving the smoke out of the large ceiling voids while the other fans were used to assist with air up the stairs and out of the garage. TK302 did a face to face with Command and informed them of the Tesla car in the garage. The fire had mostly been contained to the garage and crews worried about having a battery operated vehicle in a garage with smoldering areas. Command met with the Fire Marshals and the decision was made to leave the car alone until photos had been taken. Command told TK302 they could clear after the batteries on the fans had run out. TK302 went back in the structure and found conditions had improved and did a pass on to E37 and Q603. TK302 took out both fans from TK302 and returned to the apparatus. After the crew had TK302 back in service, we cleared off the call.

#### May 15 (C) - Trash Fire - 8712 Blazyk Drive

[Engine 301] E301 was dispatched to a reported trash fire at 8712 Blazyk Dr. Upon arrival. E301 found an unpermitted controlled burn that had spread beyond its intended burn area to approximately 1/2 acre. The homeowner was attempting to control the spread of fire upon arrival with buckets of water and a garden hose with low pressure due to the distance from the water source. The fuel source consisted of grass and small brush spreading slowly to the north and west. E301 deployed a progressive hose lay from BT301 extended off the hose reel. Fire progression was quickly stopped and crews worked on hot spots around the perimeter. The fire had spread a few feet onto the neighbor's property to the west consisting of light grass. E301 met with the homeowner after the fire was under control and found that the homeowner did not have a permit for the burn and had left it unattended for approximately 45 minutes. The homeowner stated that he's never had a permit in the past and was unaware that he needed to obtain a permit. E301 explained the permitting process with the homeowner and pointed out the issues with his selected burn site and suggested ways to improve the area for any future burns. BAT301 was requested to the scene by E301 to assist with investigation. TCSO also responded to the incident and made a report. After checking for additional hotspots, it was determined that the fire was extinguished. All units cleared the scene and returned to service.

[Brush Truck 301] BT301 responded with E301 to 8712 Blazyk Dr for a reported trash fire. Upon arrival, E301 requested a progressive hose lay for a controlled burn that had extended beyond the intended burn area. BT301 provided water and refilled the tank from a hydrant across the street from the residence. After extinguishment and investigation, all units cleared the scene and returned to service.

[Battalion 301] BAT301 was requested by E301 to come to the scene. I arrived on scene and the fire was knocked down by the engine crew using a progressive hose lay. The fire area was behind the home and was about 1/3 to 1/2 of an acre in size. This homeowner did not have a burn permit from TCESD #3 and stated he has never requested a burn permit from us. Myself and the TCSO Deputy, who also made a report for the record, had a conservation about the process that we have in place and what he needs to do in the future. This controlled burn got out of control as the homeowner left the controlled burn for about 45 minutes to do something else and the fire extended away from the burn pile. The area was not very well prepped for a controlled burn and if he had gone through our process, we would not have issued the permit until he made the area clean of material that would not facilitate fire spread. He understands our rules now and in the future will use our process. I also talked to the neighbor about the fire as it had crossed over to her property by a couple of feet. We discussed a few things about our process and how it works and she was very appreciative of what we did and what we do.

I cleared the scene and went back into service and left E301 there to finish mopping up the incident.

#### May 23 (A) – Structure Fire – AutoAid Received (Austin) – 7801 Aria Loop

[Engine 301] E301 responded to a light box alarm. On arrival, nothing was showing, homeowner was outside, and told us there is fire in the attic and he used a fire extinguisher to try to put it out. I performed a 360 and found smoke showing from the roofline. We then pulled a dry line to the front door. E301 proceeded to the second floor attic where we found heavy smoke with no fire. The attic was full of decorations, making it difficult to navigate. E301 found a 6'x6' area of burned foam on the ceiling of the attic above the AC unit. There were a couple of warm areas with a starting temp of 108 degrees with no fire. E301 did not use any water or extinguishment measures. E301 called for fans to help vent out the attic and second floor. After several minutes, we would periodically check for heat and fire,

temperatures were dropping to 84 degrees, and smoke was clearing. E301 also assisted with looking for fire extension throughout the house with nothing found. E301 then assisted the homeowner with resetting smoke detectors and powering back on the utilities. E301 reloaded all the hose back on the trucks and then cleared the scene.

[Truck 302] TK302 was dispatched to a light box alarm that was upgraded to full box prior to arrival. While enroute, the homeowner was reporting that he thought his home was struck by lightning, his attic was filled with smoke, and he saw fire that he attempted to extinguish with a fire extinguisher. TK302 arrived as the first truck and assumed Inside Truck/Division. TK302 split the crew and one crew began primary search and other met with fire attack to check fire conditions and check for extension. Primary search was completed with nothing found. Attic conditions had moderate brown lazy smoke with little to no heat. Fire Attack reported that it had not found any active fire upon arrival. TK302 did find some scorching on spray foam insulation in the attic. A search in the attic was very difficult due to it being used for storage. TK302, along with other crews, made inspection holes in the ceiling at other areas on the 2nd floor with no fire found. TK302 completed a secondary search with nothing found again. TK302 set up a vent plan and coordinated that with interior crews. Attic temps and smoke conditions began to decrease. TK302 crews exited the structure and waited for smoke conditions to improve. TK302 used the aerial ladder to inspect the roof and did confirm that there was a hole along the ridgeline with debris around it. TK302 reentered the structure to recheck the attic and it was clear with no heat. The alarm was then being downgraded and TK302 began gathering equipment. Before leaving the scene, TK302 got on the roof and covered the existing hole to keep any additional rain from getting into the house. TK302 was then cleared by Command. TK302 returned into service after deconning ourselves and equipment.

[Battalion 302] BAT302 was dispatched to a structure fire. On arrival, initial assignments were already engaged and are as follows; E301 was Fire Attack, E37 was Backup, E27 was Water Supply, and TK302 just arrived and assumed Inside Truck/Inside Division. BAT302 assumed Command, repeated assignments, coordinated the repositioning of apparatus for more advantageous tactics, and spoke with the homeowners, law enforcement, and the medic unit. No smoke or fire was visible from the Alpha side of the house but reports from multiple units throughout the call reported a hole in the attic and heavy brown smoke exiting the attic which was visible from the Charlie side. Inside Division announced primary search complete of the first and second floors and requested fans to clear out the smoke in the attic. LAD17 arrived and assumed Outside Truck and cut utilities. All units were looking for signs of fire extension both on the interior and exterior and didn't find anything noteworthy. I asked for a temperature reading in the attic which came back around 106 degrees. I held all units on scene until the smoke cleared and couldn't replicate the previous conditions. I asked for a second temperature reading in the same spot in the attic as the previous one which was 84 degrees. I cleared all units on scene except E301 and TK302 to clean up, get final gas readings, turn the power back on, and cover the hole in the roof.

The homeowners and neighbor mentioned a lightning strike prior to the fire. The homeowner said he went in the attic to extinguish the fire with an extinguisher prior to FD arrival.

#### **Special Projects Status**

- The legislative session concluded on June 3. Of the 243 bills we were watching, 23 bills have been sent to the Governor. Currently, eight bills have been signed or will otherwise go into effect.
  - Notable bills include:
  - HB33 Requires active shooter training, drills, and reporting
  - o HB198 Firefighter cancer screenings required (we're already doing this) Signed
  - HB742 requires human trafficking prevention training
  - HB1522 ESD Meeting notices posted 3 business days prior and a physical copy of the proposed budget must be provided or posted on the homepage of the Department's website when discussion or adoption is placed on the agenda
  - HB3512 –Adds AI to already required Cybersecurity training
  - HB4464 Changed workers' compensation coverage to local carrier while deployed
  - HB5084 Adds firework sales five days before Lunar New Year (generally falls) between Jan 21 and Feb 20 each year) if the County approves
  - o SB1173 No bids required when total cost is under \$100,000 Signed
  - SB1177 Checking AEDs in schools added to inspection curriculum for cadets -Signed
  - SB1405 Removes sales tax on internet access service
  - SB2778 Checks over \$2.000 list can be set to over \$50.000
  - SB2965 ESD Boards review municipal annexation service plan information and can decline disannexation if the level of service does not meet or exceed the ESD's existing level of service and also includes arbitration provisions. "Level of Service" is defined as location, deployment, and response time of fire suppression or medical resources to a structural or wildland fire or emergency medical incident.

- Chiefs Ramsdell and Wittig participated in a wildland fire tabletop exercise with several neighboring ESDs on June 5. The exercises focused on resource allocation with a secondary focus on evacuation needs and planning.
- Our Awards Banquet was conducted on Saturday, June 7, at Pecan Springs Ranch. Jackie Elkins did an outstanding job of coordinating and preparing for what was a very successful event. We are working to secure a date for next year's gathering now.

Our 90<sup>th</sup> percentile response travel time this month was 8:55. Our 50<sup>th</sup> percentile (median) response travel time this month was 4:54 for all incidents. Our average response travel time this month was 5:41.
